Between 15 April and 26 April 2017, most observed damage has occurred in the right bank (western Mosul), where airstrikes have heavily hit residential neighbourhoods. More specifically, Mosul Al-Jadeda has seen an additional 224 heavily damaged or completely destroyed residential buildings since 15 April 2017. Only severely damaged and completely destroyed buildings can be identifed with satellite imagery. For that reason, the amount of damaged buildings is likely higher than the amount indicated on this dashboard.
Information based on satellite imagery dated 26 April 2017.
